2016 TIRE APPLICATION GUIDE

How to read your tire size:

Tire size must be known in order to select a traction product. On most tires the size will look like this:

P225/75R16. This example indicates that the tire is 225mm wide, has an aspect ratio of 75% and is mounted on a wheel that is 16 inches in diameter. All of these numbers are critical in helping to find the correct traction product. The letter "P" (for passenger), "LT" (for light truck) and "R" (for radial) that sometimes appear with these numbers are much less important.

Passenger, L/T & SUV Tire Chain Applications

Check your owner's manual for information regarding the use of tire chains. These product applications show the best choice for most tires. Due to variation between tire manufacturers, the best choice for your tire may be different. To be sure, traction products should be fitted to the tire before actual use is required. Please refer to your vehicle owner's manual for any product limitations. Product stock numbers shown in RED BOLD will meet or exceed S.A.E. Class "S" clearance requirements.

* Indicates tire chain that is available in both CAM and non-CAM version. The most popular version is shown.
